Dear Adarsh,

Please find below the **complete API integration kit**, which includes all required documents, sandbox credentials, and a walkthrough video for your team's reference.

Suggested Next Steps for Smooth Integration:

1. **Start by reviewing the attached documentation** – it contains detailed technical and process guidelines.
2. **Then, view the walkthrough video [API - Google Drive](#)**, which is designed to be self-explanatory and covers the most commonly asked questions.
3. Once your team has reviewed both, please feel free to share a **consolidated list of queries (if any)** over email to robin.paul@augmont.com

To ensure faster resolution and avoid delays, we recommend reviewing the documentation and video before reaching out - this helps us focus on any specific or advanced queries you may have.

API Resources

- **API Documentation:** [Postman Link](#)
- **UAT API Base URL:** <https://uat-api.augmontgold.com/api/> (to be used in Postman Auth Folder)

Sandbox Credentials

- **Username:** connect@you-pi.in
- **Password:** W5@tY8!kM3#Qp1

Dashboard Access:

- **Username:** nexospenzfin@gmail.com
- **Password:** B2!zR6@L9#xC4q
- **Link:** <https://adminuat.augmont.com/login>

Attached Tech Documents:

- API Documentation
- Webhook Guide
- Demo File – Reconciliation
- Demo File – Commission
- Demo File – DSR Buy
- Error Message Code Sheet
- Pseudo Code

- Sample Invoice
 - Augmont Logo
-

Tech Points To Consider :

- Buy/Sell calculations available under pseudo code (attached) should match Augmont's API response
 - Invoice (downloadable and attached) must follow our format with purity and karat
 - API rate limit: Max 10 calls per minute/authentication token rate limit: Max 5 within 24 hrs.
 - Transaction ID & Unique ID are allowed under 50 characters
 - KYC validation mandatory for customers purchasing above Rs.1000
 - Payment Gateway (PG), if managed by a partner, then withdrawal (when a customer sells their holdings) shall also be managed by the partner and vice versa
 - Webhooks must be implemented (Withdrawal, Delivery*, KYC*)
 - Login API: Max 5 times per month
 - Buy/Sell transaction listings should include: Invoice downloads for Buy transactions
 - Quantity, Amount, Transaction ID, Date, etc.
 - Augmont will validate the final product before providing production credentials. This validation will take 3-4 business days per attempt (max of 2)
-

Marketing Checklist:

- Partner branding to clearly show **Augmont's name and logo**
- **"Powered by Augmont"** should be on the page where customers are purchasing the Digital Gold
- Purity to be mentioned as **24K and 999 or 99.9%**
- Include: **About Us, FAQs, and Terms & Conditions (Attached)** - also on the page where customers will be purchasing Digital Gold

We request your tech team to first go through the API video explaining all the APIs, and if the team has any queries, please do mail us the same so we can schedule a call accordingly

Please let us know if you require any further assistance

Thanks & Regards,

Dear Adarsh,

We have forwarded the NDA to our Legal team

For Sandbox credentials we would require an IP address (max 3) to for whitelisting in the UAT environment
